

**Parkers offer expanded range of Catnic products**

# BUILDERS ESSENTIALS FROM THE PROFESSIONALS

Catnic is recognised as a leading brand in the building products sector. The company has a reputation for superior quality and a record of introducing new and improved products to help the building industry meet the ever-changing environmental, legislative and economic demands.

## Catnic Plasterers Beads

Catnic's comprehensive range of Steel Plasterers Beads are precision engineered and simple to use. Fixing by nail or plaster dab is straightforward and fast, generation arises, edges, corners and joints that are easy to form and resistant to chipping, cracking and impact damage. The range includes:

- Architrave Bead
- Dry Wall Angle Bead
- Dry Wall Thin Coat Bead
- Movement Bead
- Plasterboard Edging Bead
- Standard Angle Bead
- Depth Gauge Bead
- Dry Wall Stop Bead
- Micro Angle Bead
- Plaster Stop Bead
- Render Stop Bead
- Supersave Angle Bead

## Catnic Mesh

Parkers offer a wide range of Catnic mesh products including expanded galvanised or stainless steel mesh for use primarily as an anti-cracking reinforcement in the construction of brick and block masonry.

Coil mesh is available in a variety of widths to suit most wall constructions and is supplied coiled for ease of handling. Additional applications include strengthening cornices, low walls and balconies over door and window openings.

Soffit Vent Mesh is a fine stainless steel mesh that can be easily formed and adapted to various eaves detailing to enable airflow. Helps prevent birds or insects entering the roof void through ventilation openings.

Security Mesh (or security lath) are sheets of expanded steel mesh that fit neatly into internal and external walls, ceilings and roofs and are resistant to bolt and hand cutters so they help to defend premises against forced entry.
