

**PBS supplies building materials for community studio project**

## **PARKERS SUPPORT STUDIO PROJECT**

When Rebecca Elliott of the Tunbridge Wells Community Studios Association, contacted Martin Ballantyne, the manager at our Tonbridge branch, about their new recording studio project he must have thought his chance for stardom had come at last !

In fact, Rebecca's mission was to ask Martin for help with the development of the studios which are being installed as a 'not for profit' facility for their youth and community music project. Martin was happy to oblige by supplying materials, timber and tools which have formed an essential part of the development.

Located on the site of the Ridgeway Education Centre, Southborough in Tunbridge Wells, the organisation will be a central focal point for music activities for all enthusiasts.

The music project and recording studio are being supported by the Kent Community Foundation, Tunbridge Wells Borough Council, Kent County Council, the Town and Country Housing Association and Hyde Housing Association.

Parkers supplied a large quantity of timber and satin wood paint which formed a part of the TWP Central Studio itself so it is a very satisfying project for us to be involved with, especially if any budding stars are discovered at the complex in years to come. And especially if the Martin Ballantyne band decide to lay down some tracks any time soon !

Good luck to Rebecca and everyone involved.
