

Latest Parker Building Supplies Newsletter now available

EXTRA EXTRA... READ ALL ABOUT IT!

Parker Building Supplies' latest newsletter is now available, packed as ever with invaluable product information, special offers and our usual wry look at life on the cover page – this time focussing on the shenanigans leading up to the election.

In this issue we focus on green issues and our recent mission to promote renewable and eco-friendly products via on-line marketing, direct mail and our new Spring offers leaflet, but more importantly through extensive staff training programmes. This enables us to make sure that when you have a question about energy efficient products we can answer appropriately and make sure you get exactly the items you need ... and at the best prices.

NEW PRODUCTS

Among the many new products we are promoting is the extensive range of Everbuild sealants, fillers, adhesives and building chemicals. These are promoted under various well known names such as Aquaseal, Geo-Fix, Opti-Mix, Kwikgrip and the newly relaunched FEB brand.

We also feature the Fakro balcony window which transforms most loft conversions but combining the traditional sash style window with a unique folding lower sash which folds down at a 45° angle to create a balcony with side barriers. A truly stylish (and safe) innovation.

There are also features on Marley's lightweight aluminium Alutec Guttering, designed to look like the traditional cast iron equivalent but obviously far more practical and low maintenance; Lafarge Aquaboard, the new dimension in Gypsum boards for wet or high humidity installations; and the Elka Uniclic flooring offer which is also featured on these news pages.

Don't miss out on your copy. Call in or call us at any of the branches listed below and we will send you a copy.
