

A complete range of ACO drainage now available at Parkers

ACO BUILDING DRAINAGE RANGE EXPANDED

Parker Building Supplies now offer an even greater choice of ACO's excellent building drainage range. The products are made from corrosion resistant materials, making them as reliable and efficient as they are popular among discerning contractors.

ACO HEXDRAIN

is a revolutionary high quality, high strength domestic channel drainage system, available in a choice of black plastic, metallic effect plastic or galvanised steel gratings.

ACO HEXDRAIN PRO

is a high quality channel drainage system manufactured from recycled polypropylene.

ACO HEXDRAIN BRICKSLOT

provides a discreet slot drainage system for domestic block paving installations and threshold drainage.

Hexdrain systems are fully certified and CE marked to BS EN 1433: 2002 Load Class A15 making them ideal for a wide range of domestic and light traffic applications.

RAINDRAIN

ACO RAINDRAIN PLUS

is a versatile domestic polymer concrete channel system, particularly suitable for block paving applications. The system is fully certified and CE marked to BS EN 1433: 2002 Load Class A15 and B125, depending on whether the standard galvanised steel or optional iron grating is selected.

ACO RAINDRAIN PRO

is a lightweight channel drainage system designed for light to medium duty traffic applications
